

東南大學

Dear Admissions Committee,

It is my honor to write this letter recommending Mr. Hanshi Sun for your graduate program. I am well acquainted with him, as I have instructed him in two research projects since December 2021. Currently, I am his graduation project advisor in computer vision. The close interaction between us provided me with a good opportunity to witness his research potential, and I appreciate this opportunity to share my observations of his ability.

During our interactions, Hanshi has shown strong hands-on skills and learning initiative. In one of my research works regarding medical imaging and machine learning, Hanshi contributed a lot and was responsible for the paper writing and revision. Hanshi had already cultivated an independent research habit, and he regularly updated me on the progress during weekly meetings. If he encountered problems, he would proactively seek my advice on several feasible solutions. Later, in the research project on Multi-Modal Multi-task Transformer on Fundus Images, I assigned Hanshi to teach himself some classical algorithms and reproduce some baseline algorithms using the MMDetection framework. Though Hanshi is not a computer science major, he is a quick learner and makes up for his lack of background quickly by self-learning to keep abreast himself of the whole project.

Furthermore, Hanshi is an excellent team contributor. His important contribution to the two papers was well recognized. The high-quality content revealed his thorough understanding of the project and his academic writing proficiency. Hanshi also has a high work efficiency as he makes good use of his time in research and studies. His independent problem-solving and learning abilities set a good example for his peers, even those who are fresh graduate students. In Hanshi's current work on his graduation project, I have seen him commit his spare time to reading relevant materials, exchanging ideas with group members, and being a frequent visitor to my office. Sometimes he puts forward refreshingly novel ideas, reflecting his diligence and critical thinking.

It is an enjoyment for me to instruct Mr. Hanshi Sun's project research. From what I know of him, I believe he will be a welcome addition to your school. If you need further information about Hanshi, feel free to let me know.

Sincerely,

A handwritten signature in black ink, appearing to be '周毅' (Zhou Yi).
